Subject: AP Electrical Co. quote for Harlen Road, Salisbury

Hi Gregory,

Thanks for your call earlier. I run a Brisbane-based electrical business, I've got 15+ years' experience and an excellent reputation with my partner builders and customers.

My lump sum estimate for this project is \$250,000, after going through the plans in detail.

This price covers the supply and install of all reticulation, lighting, power, NBN connection fees, switchboards and communication requirements as per the drawings. This does not include the mechanical ventilation for the bathrooms and toilets.

Please let me know if you have any questions.

Look forward to hearing from you.

Regards,
Adam Peters
