Client Information

Wins, Successes or Issues from the previous day (HSE & Quality):

What went well yesterday?	
What did not work well yesterday?	
What are we doing to address it?	
Work front activities for today (Key Activities):	Continue with remediation works Continuation with Earthworks, fill materials deliveries Coates delivery - telehandler
High Risk Work activities for today	Excavation Mobile plant Asbestos removal
HSE hazards / risks that may be encountered today - Hazards	Vehicle / Mobile plant movement Asbestos Dust Deep excavations
HSE hazards / risks that may be encountered today - Controls in place	Spotters Positive communication Machine exclusion zones Licensed contractor Water cart

GROUP DISCUSSION POINTS

Site changes since last shift	No
SWMS in Use	Yes
Details	Asbestos removal Mobile plant

Prestart - Daily Shift/Closeout Meeting - YUR 1006

Excavations
remediation

Interactions with adjacent crews or 3rd Party's	No
Permits required	Yes
Details	2 permits system running - remediation and civil earthworks works
Isolation Points	No
New workers or visitors to site	No
Emergency Response preparedness	Yes
Details	Emergency response plan in place
Breathalyser checks required	No
<i>In line with client / EQL AOD Standard S008</i>	
Details	
HazChat / JSEA to be Completed	Yes
Assurance Activities	No
HSE Alerts for today	JSEA Awareness - Request from Yurika hierarchy to close out an ISO audit action in preparation for the ISO Audit in August. That is to give awareness of Yurika risk management tool called JSEA. Understand that this project, do not use the JSEA tool, it just to make people aware the JSEA is used at other Yurika project site. Does everybody know what a JSEA (Job Safety Environmental Analysis) is? Have you used it before? Keeping it high level - A JSEA is a basic and low level risk assessment tool and sits with the individual, informal risk assessment tools. An alternative risk management tool of the Hazchat. The JSEA is aimed at ensuring that all sections are completed and that supervisors are involved in verifying and approving. See any Yurika Rep if you wish to learn more of the JSEA.
HSE Focus for the day	HazChat and Plant Prestart in Lucidity and keep the Pos Comms up when interacting with Vehicles or Mobile Plant.

Daily Close out Meeting

Daily Close out Meeting

Have all Personal Danger Tags been removed?	N/A
Have all work permits been cancelled?	N/A
Have all redundant barricades been removed?	N/A
Did everybody have a safe day?	Yes
<i>If No document & report the incidents/accidents/plant damage discussed</i>	
Any issues or constraints arising from the day?	No
What went well and we should keep doing?
