- ☐ Scaffold
- ☐ Roofing
- ☐ Flooring
- ☐ Doors and hardware
- ☐ Joinery
 - Are all items intact
 - boxes unopened
 - delivery docket issued
 - items match delivery docket Inc. quantity?

Facsimile to surveyor

Noting the Answer area cannot be edited, I would not send a fascimilie, I would email the appropriate subcontractor (Bennett and Bennett, SCSS, SEQS, Project Urban etc.) and ask them to meet on site to discuss the works

Email to services

I would visit www.1100.com.au for a Dial Before You Dig report of all services running into the property. If there is not a house/structure in existence generally there should be a power pole awaiting connection (which has been provided) and a water meter to be moved/connected. Unity Water can be contacted for further information regarding water/sewer, Energex for power and local council for assistance in approvals or plans on file. Comms companies vary yet can assist in identification of underground services and if they're live/decommissioned etc.
