Scaffold Inspection Checklist

Site address:

Project number:

Date:

Scaffold surrounds

	Yes	No
Has public protection been provided?	Yes	No
Have sufficient safeguards against electric powerlines been provided?	Yes	No

Structure supports

	Yes	No
Is the supporting structure in good condition?	Yes	No
Does the supporting structure have adequate strength?	Yes	No
Are there sufficient controls to prevent deterioration of the supporting structure?	Yes	No
Is the risk of the supporting structure being overloaded from other sources adequately controlled?	Yes	No
Is the scaffold built on solid ground? If built on soft ground, are soleboards used to properly distribute the load?	Yes	No

Scaffold Structure

	Yes	No
Are the standards bearing firmly?	Yes	No
Are the standards plumb (or as designed)?	Yes	No
Are the longitudinal standard spacings correct?	Yes	No
Are the transverse standard spacings correct?	Yes	No
Are the joints in standards correctly positioned?	Yes	No
Are the joints in standards correctly secured (special duty or hung scaffold)?	Yes	No
Are the ledgers level (or as designed)?	Yes	No
Are ledger joints correctly positioned (tube and coupler scaffold)?	Yes	No
Are there sufficient transoms/putlogs?	Yes	No
Are the transoms/putlogs correctly positioned and secured?	Yes	No

Is the bracing adequate?	Yes	No
Is the scaffold sufficiently stable?	Yes	No
Are the ties correctly positioned and correctly fixed?	Yes	No
Platforms	Yes	No
Does the scaffold have the required number of working platforms?	Yes	No
Are the working platforms at the required locations?	Yes	No
Are catch platforms correctly positioned?	Yes	No
Are the platforms and supporting scaffold constructed for the appropriate duty live loads?	Yes	No
Are the platform dimensions suitable for the intended work?	Yes	No
Is there adequate edge protection?	Yes	No
Are the platforms correctly constructed?	Yes	No
Are planks secured against wind?	Yes	No
Access and Egress	Yes	No
Is there safe access and egress to every scaffold platform?	Yes	No
Are temporary stairways correctly installed?	Yes	No
Are portable ladders of an industrial grade, serviceable and correctly installed?	Yes	No
Are access ways and access platforms correctly installed?	Yes	No
Containment sheeting	Yes	No
Has the scaffold been designed for wind loading on any containment sheeting?	Yes	No
Are the fixing ties secure?	Yes	No
Are the overlap joints satisfactory?	Yes	No
General fitness for purpose	Yes	No
Is there adequate provision for material handling?	Yes	No
Are the clearances between the scaffold and adjacent structures correct?	Yes	No
Is there adequate protection from falling debris?	Yes	No
Has the scaffold been adequately designed to support all attachments?	Yes	No
Are all approaches and platforms effectively lit?	Yes	No
Administration	Yes	No

Has scaffold specification and maintenance documentation been provided from the contractor?	Yes	No
Have Safe Work Method Statements been provided?	Yes	No
Do all contractors attending site hold a Construction White Card?	Yes	No
Do all contractors attending site hold High Risk Licence?	Yes	No
Have site inductions been completed for all contractors attending site?	Yes	No
