## VARIATION

**JOB:-** Harcourt Lodge CTS 6266

**DATE:** 21.07.23

**JOB No:-** 43465

**VARIATION QUOTATION No:** V.01

**CLIENT:-** Body Corporate Services / Harcourt Lodge

**SITE INSTRUCTION No:**

**ATTENTION:-** Maree Cathcart / John Luong / Christopher Smith

| DESCRIPTION OF VARIATION |                                                                                                                                                                             | QUOTATION          |           |
|--------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------|
|                          |                                                                                                                                                                             | Addition           | Deduction |
| V.01                     | Dig 300mm piers at 2m centres x 1.8m deep. Install a thickening beam at the join between driveway and garages. This will allow the driveway to sit independent of the soil. | \$ 3,900.00        |           |
|                          |                                                                                                                                                                             |                    |           |
|                          |                                                                                                                                                                             |                    |           |
|                          |                                                                                                                                                                             |                    |           |
|                          |                                                                                                                                                                             |                    |           |
|                          |                                                                                                                                                                             |                    |           |
