Ross just in with a client
Tank dimensions are on your siting
The tank has height-width etc

Hi Johnny,

Ok no worries we need to go for lower tank or adjust window to suit, can you send me the tank dimensions please.

Thanks, Ross

Hi Johnny, we will have 1500mm below window for water tank from FFL and the tank slab will be lower so we should have 1600mm minimum can this work? and air-con compressor between office and theater windows or in corner of outdoor living and office?

Thanks Ross

Ross,

As per drafting, please be advised of the following –

- Relocate A/C to rear of home theatre and home office/library,
- Relocate tank to home theatre side elevation,
- Delete XOX0627 to home theatre due to water tank.

Ross, I would seriously be contemplating an Aquacomb system that is incorporated with your slab. Price approximately 3k.
