INTRODUCTION

This workbook contains activities made up of questions, tasks and research projects.

All the activities are aligned to the various section of the 'Student Manuals' of the same subject matter.

A Research activity will request the student to gather information from various sources to support what you have learnt through the manuals.

A Task is an activity that would require you to create, develop or report on certain subjects, processes or procedures related to the subject matter being taught in each of the manuals.

A Question activity will ask you to answer a series of questions to test your knowledge of what was presented in the manuals.

REQUIREMENTS

For this course you will need access to a computer and access to the internet.

You will also need folders and files to store your written reports, information gathered during your research and any notes you may create.

There are several times you are requested to present your folders and materials to your teacher/trainer for review and comment.

WORKBOOK CONTENTS

Working with Nursery Plants <i>Nursery Review</i>	Section 1	Page 6
